

SGWEIGH

AS10-1-1/AS14-1-1 10-head High-precision Multihead Weigher

The 10-head high-precision multi-head weigher adopts a vibrator, which can automatically adjust the amount of vibration according to different target weight values, so that the feeding is more uniform and the combination is higher. The quantitative multi-head combination weigher is mainly used in conjunction with the automatic packaging machine, and is suitable for measuring and packaging granular and powder materials.

Main Advantages

1. Factory parameter setting recovery function;
2. Support 200g, 1000g multi-segment weight calibration;
3. It can be automatically paused when there is no material to make the weighing more stable;
4. There is a help menu in the display, which is convenient for learning and using;
5. It can store 100 sets of parameter settings to realize multi-faceted learning and use;
6. The amplitude of each line can be adjusted vertically during operation, which can make the feeding more uniform.

Technical Parameters:

- Single weighing range 2-100g 2-200g
- Weighing accuracy range X(0.5) X(0.5)
- Maximum weighing speed 65P/M 120P/M
- Hopper capacity 0.5L 0.5L
- Operation interface 7" touch screen 7" touch screen
- Optional device
- Drive mode stepper motor stepper motor
- Power requirements 220V/900W/50/60HZ/8A 220V/1100W/50/60HZ/10A
- Packing size 1200(L)X920(W)X920(H) 1200(L)X970(W)X970(H)
- Packaging device 220kg 240kg
