

AF-FFS Bag Forming Filling & Sealing Machine

AF-FFS coffee filling sealing packaging machine is for Bags forming.

Servo motor controlled film walking, high precise with less errors.

Servo motor controlled vertical auger to fill, keep 0.3 grams errors

Global top brand PLC and Touchscreen, very easy to use and maintain.

Rugged constructed to guarantee a long service life. Most of the body is built with stainless steel 304 and food grade stainless steel (SS316) is used for all parts in contact with product.

Feature:

- Efficient: Bag – making, filling, sealing, cutting, heating, date / lot number achieved in one time;
- Intelligent: Packing speed and bag length can be set through the screen without part changes;
- Profession: Independent temperature controller with heat balance enables different packing materials;
- Characteristic: Automatic stop function, with safe operation and saving the film;
- Convenient: Low loss, labor saving, easy for operation and maintenance.

Product Parameter:

Sealing Type	Center Seal, stand-up seal, four side seal (optional)
Roll Width	320 mm-820 mm
Feeding System	Auger Filler / Screw Filler
Electrical Supply	220 V, AC, 50/60 HZ
Packing Film	Composite material: OPP/OPP, OPP/CE, MST/PE/PET/PE
Temperature Controller	PID
Machine Speed	5-60 Pouches / Min (Depends upon Pouch Size and product weight to be filled)
Contact Parts	Food Grade Stainless Steel SS 316 / SS 304
Air Consumption	0.3m ³ /min, 0.65Mpa
Power Consumption	2.2 KW
Additional Attachments	Batch Cutting Device, Pneumatic Coding Device, Nitrogen Flushing
