

LQ-DC-2 Drip Coffee Packaging Machine (High Level)

This high level machine is the latest design based on the general standard model, specially design for different kinds of drip coffee bag packing. The machine adopts fully ultrasonic sealing, compared with the heating sealing, it has the better packaging performance, besides, with the special weighing system: Slide doser, it effectively avoided the waste of coffee powder.

Feature

1. The working efficiency is higher than general model in the market.
2. Slide doser, 0 coffee powder residue, no waste, accuracy keeps to the last second packet.
3. Automatic air pressure detecting device. Air pressure is important for making the perfect product.
4. Multifunctional sensor, no coffee material alarm, no packing material alarm, inner eye mark.
5. Inner empty bag alarm, inner bag connect alarm, outer envelop eye mark.
6. 3 functions avoid the coffee powder stuck: vibrating, vertical stirring and material sensor.
7. Safety guard device.

Technical Parameter

Working speed	About 50 bags/min
Bag size	Inner bag: Length: 90mm * Width: 70mm
	Outer bag: Length: 120mm * Width: 100mm
Sealing method	Fully 3-side ultrasonic sealing
	3-side heating sealing
Weighing system	Slide Doser
Weighing arrange	8-12 grams/bag (Based on the material's proportion)
Filling accuracy	± 0.2 grams/bag (Depend on the coffee material)
Air consumption	≥0.6MPa, 0.4m ³ /min
Power supply	220V, 50Hz, 1Ph
Weight	680kg
Overall dimensions	L*W*H 1400mm * 1060mm * 2691mm
