

Milk / Coffee Powder Mixing Machine V-50

V Mixer Machine is applied to good liquidity dry powder and granular material mixing from many industries. This Mixing Machine has a special structure, its mixing efficiency is high and no blind corner. The machine is made of 304 stainless steel, 316 stainless steel can be customized as required. And the mixing barrel is polished both inside and outside. The material in the V-type mixing container flows smoothly without damaging the original material.

Technical Parameters:

- Model No.: V-50
- Application: Powder, Medicine Processing, Chemicals Processing, Food Processing
- Barrel volume (L): 50
- Max. Loading Volume (L): 30
- Weight (KG): 160
- Dimension(L*W*H): 1550*650*1650
