

Coffee Filling Cab Machine

This is a bottle-filling capping machine for coffee beans, a machine with fully automatic weighing, filling the coffee bean into a bottle or can, then capping and labeling.

This is a coffee bottle line, automatic powder filling, volume dosing, can seaming, and capping.

Parameters:

- Material: 304# stainless steel
- Conveyor belt: 2 meters
- The fastest speed: 45 cans/min
- Power specification: 220V 50/60HZ
- Power: 800W
- Weight: 200kg
- Size: L200*W80*H100CM

Rotary-type filling equipment

Parameters:

- Material: 304# stainless steel
- Conveyor belt: 2 meters
- The fastest speed: 45 cans/min
- Power specification: 220V 50/60HZ
- Power: 800W
- Weight: 200kg
- Size: L200*W80*H100CM

Fully auto high speed can seaming machine

Parameters:

1. Number of sealing heads: 1
2. Number of seaming rollers: 4 (2 first operation, 2 second operation)
3. Sealing speed: 35 ~ 50 cans / min (adjustable)
4. Sealing height: 25-220mm
5. Sealing can diameter: 35-130mm
6. Working temperature: 0 ~ 45 ° C, working humidity: 35 ~ 85%
7. Working power supply: single-phase AC220V 50/60Hz
8. Total power: 2.1KW
9. Weight: 330KG (about)
10. Dimensions: L 1850* W 840* H1650mm
L 2650* W 840* H1650mm

Main Features:

1. Whole machine servo control makes the equipment run safer, more stable and smarter. The turntable only runs when there is a can, speed can be adjusted separately; when there is can be stuck, the turntable will automatically stop. After one button reset, the error can be released and the machine restarts to run; When there is a foreign object stuck in the turntable, it will automatically stop running to prevent artificial Equipment damage and safety accidents caused by incorrect operation of the equipment.
2. A total of 4 seaming rollers are completed at the same time to ensure high sealing performance.
3. The can body does not rotate during the sealing process, which is safer and is especially suitable for fragile and liquid products.
4. The sealing speed can reach up to 50 cans per minute, high production efficiency.
5. The whole machine has a transparent blue acrylic cover, and multiple protection, more beautiful and safe.
6. Applicable to tin cans, aluminum cans, plastic cans and paper cans, it is the ideal packaging equipment for food, beverage, Chinese medicine drinks, the chemical industry, etc.

Dust-proof capping machine

Parameters:

1. Material: stainless steel
2. Capping speed : 50-60 cans/min
3. Can diameter : 40-130mm
4. Can height:50-220mm
5. Conveyor speed:10.4m/min
6. Power supply: 220V 50/60Hz
7. Power:600W
8. Weight:300kg
9. Size:1750*750*1650mm

Main Features:

1. Straight belt buckle capping and turntable type capping can be selected, stable operation, fast speed
2. All 304# stainless steel material, dustproof, rustproof, easy to maintain, beautiful and durable
3. The capping wheel can be adjusted up and down, suitable for cans of different heights, and easy to adjust
