

TTF-700AF Fully Automatic Disposable Food Container Making Machine

Fully automatic disposable food container making machine is our latest developed core product. The machine combines forming, punching, cutting, and stacking into process. widely used and suitable for most of the customer requested, it can produce plastic trays, containers, boxes, lids, etc. The machine is completely driven by servo motor, stable operation, low noise, high efficiency, high quality.

Fully automatic disposable food container making machine is not only limited to producing disposable food containers, the machine can produce more plastic products such as coffee cup lids, egg trays, mobile phone trays, nursery trays, hardware trays, vegetables and meat by changing molds product preservation boxes, cosmetic trays, medical injection trays, sauce containers, chocolate boxes, plastic bowls, etc., can cover almost daily necessities, with a wide range of functions, stable operation, fast production efficiency, etc.

Technical Parameters:

Model	TTF-700AF	TTF-700A
Forming Area	700mm x 600 mm	
Forming Depth (Max.)	135mm	
Sheet thickness	0.2-2.0mm	

Forming Speed (Max.)	30times/min	
Air pressure	0.6-0.8mpa	
Air consumption	3.6 m ³ /min	
Water consumption	0.7 m ³ /h	
Sheet width (Max.)	730mm	
Suitable Sheet	PP, PS, HIPS, PET, PVC, PLA etc.	
Power supply	AC 380V, 50Hz, Three-phase, Four-wire	
Used power	105Kw	95Kw
Rated power	210Kw	190kw
Heating power	118Kw	
Procedure	Forming-punching-cutting-stacking	Forming-cutting-stacking
Dimension	L13000*W4700*H2750mm	L11500*W4700*H2750mm
Weight	About 25.0T	About 19.0T
