Ice Cream Cone Making Machine 4 Head GG-4

The development of our company's wafer ice cream cone machine designed with humanization, simple operation, this machine is divided into the upper die and mould halves, when using temperature control knob, temperature by first tone up, wait temperature rise, upper die up, lower die fold, pour material, then will the oars with lower die others in molding, about one or two minutes later, cone shaped, at this time will can pull up, upper die mould halves pulled open, cone will automatically fall into the following slide in and trickles out.

Advantage of 4 Head Wafer Cone Maker Machine

Stainless steel, easy operation, high efficiency. Low noise, High Capacity with low Power. Easy to operate, Easy for cleaning. We have many different molds for different size and shape cones, and you can replace the molds on the machine. We also have many different capacity products, you can choose different baking numbers of the machine according to your need. We can produce the goods as your requirements.

Technical Parameters:

Model	GG-4
Production Capacity	120pcs/h
Rated Output	2.4KW
Net Weight	72kgs
Main Power	220V/50HZ
Overall Dimension(mm)	420*450*720
