

Rotary Type 8 Heads Square Bottle OPP Labeling Machine

Hot melt adhesive labeling machine: suitable for round bottles, square bottles, flat bottles, oval and other PET and glass bottles or containers. It is suitable for labeling before and after filling. It has the characteristics of reasonable design, reliable performance, low operating cost and high cost performance.

Features

- PLC control system, full-automatic working
- Main engine is controlled by three-phase converter motor, speed adjustable
- Disc label-pasting and label-adsorbing
- Include such mechanisms as label-providing, belt-conveying, label-cutting, wheels-attaching, vacuum-adsorbing, hot sol-conveyance
- Hot sol providing machine is made in a hundred million Hertz.
- VAC and PUMP don't start working unless the hot sol machine gets to designed temperature.
- STOP(ALARM) installation for label running-out
- STOP installation for pasting failure
- Applied to different specifications of packing for food, chemical, medicine, cosmetic and daily necessities
- Bottle material: Plastics, glass, steel, etc
- Made of stainless steel SUS#304 and imported T6 aluminum alloy after being anode hardened Adjustable label-pasting speed of main engine

Technical Parameter:

Model	RFL-L100	RFL-L150	RFL-L200	RFL-L250	RFL-L300
Labling speed(BPH)	6000	9000	12000	15000	18000
Available container	Diameter 30-120mm, Bottle height 70-340mm				
Labeling precision	+- 0.2mm				
Roll film diameter	Max. 500mm with 3 inch or 6 inch diameter paper core				
Power	9KW	9KW	11KW	11KW	11KW
Dimension(mm)	3300*1500*1680	3300*1500*1680	4000*1600*2100	4000*1600*2100	4000*1600*2100
