

CB-SP130 Small Premade Pouch Packing Machine

This versatile machine is perfect for packaging particles, powders, liquids, and sauces across various industries

With its compact size, affordability, and advanced features like automated processes, customizable feeding structures, touch screen operation, and precise temperature control, it's a top choice for efficient and cost-effective packaging solutions.

Outstanding Features

- **Versatile Application:** Ideal for packaging granules, powders, liquids, and sauces in industries such as food, medicine, chemicals, and cosmetics.
- **Fully Automated Process:** The machine performs bag making, measuring, filling, sealing, cutting, and counting automatically, eliminating the need for manual operation. It can also fulfill additional functions like printing batch numbers according to customer requirements.
- **User-Friendly Operation:** Equipped with a touch screen interface for easy operation, PLC control for efficient performance, and automatic temperature compensation for precise and aesthetically pleasing sealing.
- **Compact Design:** The price is favorable and it is the best choice for small factories.

Package Materials:

PE composite film, such as: pure aluminum, aluminum plating and other prefabricated bags.

Technical Parameter:

| Model: | CB-SP130 |
|---------------------|---------------------------------|
| Bag Support: | flat bag, zipper bag, hang bag |
| Packaging Speed: | 55 -70 bags/minute |
| Bag Sizes: | Length 80-180mm, Width 55-120mm |
| Machine Size: | 2192* 1356 * 1738 mm |
| Machine Net Weight: | 550KG |
| Machine Power: | AC220V / 50 – 60Hz / 4.5kw |
| Gas: | ≥0.6Mpa |
