

Automatic Small Flour Packaging Machine TT-320F/TT-130F

This small flour packaging machine is suitable for all kinds of powder, like bean powder, coffee powder, corn powder, milk powder, flour, wheat flour, cassava powder, and all kinds of spices.

Features

1. The small flour packaging machine adopts a high-precision servo film transport system, PLC Program Control, developed touchable Human-machine Interface of Advanced Automatic Positioning, Photoelectric Tracking, Digital Temperature Control, etc.
2. Operation is more Simple, and perfect. It is the first choice of the food packaging industry to Improve production efficiency, reduce Labor Intensity, and improve the grade of packaging equipment.
3. Transverse and longitudinal sealing Temperature Control independently, suitable for PE/polyethylene, PE/aluminum plating, pet/PE, pp, and other heat-sealing packaging materials, etc.
4. It completes the whole procedure of filling, measuring, bagging, date printing, charging (exhausting), product out-putting automatically.
5. High precision, and high efficiency without crashing the materials.
6. Packaging style diversified, back sealing, gusset bag, continuous bags, punching, etc.
7. Work environment quiet, low noise, saving energy.
8. A complete set of equipment is economical.

model	TT-320F	TT-130F
Bag Type	Back Sealing Type	Three sides sealing type or fours sides sealing type
Max. film width	320mm	260mm
Packaging speed	30-50 bag per minute	30-50 bag per minute
Bag width	25-150mm	40-130mm
Bag Length	50-200mm	40-160mm
