

Liquid Filler RZYT-500

Applications:

Fruit juice, Liquid soap, liquid chemical products and other liquid products etc.

Features:

Liquid filler is a kind of semiautomatic piston liquid filling machine, and suitable for filling various light viscous liquid products.

1. Complying with GMP standard, all product contact parts are in stainless steel.
2. Filling with high precision, filling volume and speed can be adjusted.
3. Filling head adopt anti-drip and anti-drawing device.
4. Combined with packaging machine and other packaging related equipment.

Specification:

Model	RZYT-500
Working mode	Piston type
Weighing Range	10-500ml(can be customized to 3000ml)
Weight Accuracy	±1%
Speed	0-50times/min
Hopper Volume	70L
Voltage	380V 3-Phases 50/60HZ
