

TL-50L2-2A Double Nozzle Filling Production Line

Quantitative filling, freezing, capping for ointment products such as medicines, make-up remover cream, eyeliner, cream, and repair cream, suitable for the production of various containers or molds

Features:

1. Double nozzles filling at same time
2. Filling controlled with servo ceramic pump
3. Auto capping machine to increase production capacity
4. With double tank switch station, easy bulk change
5. Servo lifting tank for different product; Optimize tube line for easy cleaning
6. HMI interface operating system to ensure adjust quickly, memory function for easy changing/saving system configuration

Specifications:

- Output : 40-70 pcs/min
- Nozzle No. : 2
- Tank : 50L*2 pcs
- Operator : 1
- Power : 1Φ 220V 8kw
- Weight : 3000kg
- Power supply : 1 phase-220V, 3 phase- 380V
- Compressed air : 6-8 kg/cm²
