

## *10 Meters Automatic Oral Dissolving Film Making Machine*

### **Performance & Features**

High dosing accuracy, quick-dissolving, fast release, no swallowing difficulty, high acceptance by elderly and children, small size convenient to carry.

### **Working Principle**

The working principle of the machine has evenly coated a layer of liquid material on the surface of the reel base roll. The solvent (moisture) is rapidly evaporated and dried through the drying channel. And winding up after cooling (or composite with another material). Then, get the final products of the film (composite film).

### **Technical parameters**

Model	OZM-340/10
Oven Length	10M
Max Casting Width	360mm
Roll Width of Film	400mm
Running Speed	0.1m-1.5m/min (depends on formula and process technology)
Temperature Control	30~80°C±2°C
Power Supply	380V 50/60HZ100KW
Overall Dimension	L×W×H: 14000*1620*2050mm
Weight	About 8000KG
