

BZ002 Automatic Granule Back Seal Packaging Machine

This automatic multifunctional packaging machine is clean, sanitary, stable in performance, low in power, efficient and safe. It is suitable for use in a variety of scenarios; it is suitable for packaging food, powder, granules, tea, seeds, grains, wheat, beans, small hardware and components and other materials.

The granule packaging machine is made of food-safe and rust-proof stainless steel, equipped with reliable electrical and mechanical components. High packaging capacity and speed, high efficiency, reducing your labor costs. The machine has a series of functions such as automatic measuring, filling, bagging, sealing and cutting. The finished packaging bags are reliable and elegant.

Features:

1. Adopt microcomputer and stepper motor intelligent control.
2. Good performance, clear sealing lines and firm sealing.
3. Fast speed and high precision.
4. 304 stainless steel body, anti-corrosion and dustproof.

Technical Parameters

Product Name	Multifunctional Granule Powder Packaging Machine
Hopper capacity	10L
Packing speed	10-20 bags/min
Bag width	100mm (customized, up to 350mm)
Filling range	1-100g (customized, up to 5000g)
Film material	Aluminum paper plastic (OPP CPP PET PE) film
