

## ***DZS-280 Automatic Horizontal Doypack Packaging Machine***

DZS-280 series Automatic Horizontal Doypack Packaging Machine has doypack function & duplex design, meet multifunctional packaging requirement like hanging hole, special shape, zipper or spout, the filling capacity is 600ml, the maximum speed can reach 120bags/min.

Pouch making, sealing and filling are relatively independent system. The two systems are connected by mechanical connection and PLC. Therefore, suitable for different packaging material and pouch sizes. Finished product sealing system uses hot seal packaging material to go on automatic pouch making, and so on. Pouches are doypack, special shape, hanging hole. Selecting different filler can package different products.

### **Technical Parameters:**

| Model               | DZS-280S                  | DZS-280DSZ                |
|---------------------|---------------------------|---------------------------|
| Pouch Size (width)  | 90-140mm                  | 90-140mm                  |
| Pouch Size (length) | 110-250mm                 | 110-250mm                 |
| Filling Capacity    | 600ml                     | 600ml                     |
| Packaging speed     | 80-120                    | 80-120                    |
|                     | pouches/min               | pouches/min               |
| Power               | 13.5kw                    | 15.5kw                    |
| Air Consumption     | 400NL/min                 | 400NL/min                 |
| Machine Dimensions  | 9220x1210x                | 10120x1210x               |
| (LxWxH)             | 1500mm                    | 1500mm                    |
| Weight              | 3000kg                    | 3200kg                    |
