

## *HCCW-300P/500P Weighing Instant Printing And Labeling Machine*

The equipment is an automatic weighing printing and labeling machine; the product is connected to the automatic weighing machine, and the weight information is sent to the instant printing and labeling machine in real-time;

The labeling machine automatically prints label information, and automatically completes the labeling process; it has high stability and is suitable for online operations of various cartons, cartons, and large bags.

Applicable labels: self-adhesive labels, self-adhesive laminated labels, etc.

Application industry: Widely used in daily cosmetics, food, medicine, electronics, hardware, plastics, and other industries.

Printing products: production batch number, serial number, anti-counterfeiting code, electronic supervision code, barcode, ingredient list, etc.;

Compatible products, real-time communication with barcode scanners, machine vision, weighing, testing, and other equipment, so as to provide superior solutions for refinement and intelligence.

### **Technical Parameters**

Model	HCCW-300P	HCCW-500P
Weighing Range	5-2500g	1-10 kg
Highest Sorting Accuracy	±1g	±10g
Detection Speed	Max Conveying Speed : 30m/min	Max Conveying Speed : 20m/min
Height of Conveyor belt from the ground	750mm±50mm (Special specifications can be customized)	
Culling Method	Push Rod Type
