

ZX-R60 Spider Hand Packing Machine

Technical features:

- Adopt PLC+touch screen control to display the action status and alarm information in real time
- Integrates product conveying, visual inspection, picking and packing in one, with a compact structure. The operation is set up with manual mode and automatic mode for easy operation
- Equipped with multiple protection functions, it will shut down in time when a fault occurs
- By combining vision and high-speed parallel robots to pick and pack, the speed is faster
- One machine for multiple uses, multiple recipes can be preset, strong compatibility
- Front-end standard formula rolling flat machine to ensure the product surface is flat. Equipped with vacuum pump, not affected by external compressed air. The product can be placed in the carton both horizontally and vertically at the same time, with high flexibility
- Other options:
 - ① Specified robot brand
 - ② Specified brand of electrical components
 - ③ Stainless steel body/customized color

Equipment parameters:

Model	ZX-R60
Power supply	380V 50HZ 5Kw
Air pressure	≥6Kg/cm ² 0.2m ³ /min
Delta	Imported or domestic brands can be selected according to requirements
Applicable Products	Bagged, boxed..
Speed	≤60times/ minute
Applicable carton	L200~500xW150~400xH120~400mm
Arrangement	Design according to the actual packing method
Material height	900mm Design as needed
Carton height	600mm
Mechanical Dimensions	L1500xW1500xH2000mm
Mechanical weight	600Kg
Equipment material	The main material is carbon steel spray plastic, and the contact part with the material is made of stainless steel (Can be customized upon request)
