

CPTTF - 30 Semi Automatic Tube Filling/Capping

An automatic tube filling machine is used for the purpose of filling up of tubes. We at Chamunda Pharma Tech are skilled at manufacturing automatic tube filling machines that are known for their strong construction, reliable operation and smooth functioning. As a leading name in India when it comes to the construction and supplying of these machines, we can deliver high quality products at each and every step.

Our automatic tube filling machines guarantee a long lifespan and require relatively less maintenance. We also make use of excellent stainless steel material for ensuring corrosion resistance. Such features make our automatic tube filling machine units very popular in the Indian industrial sector.

Technical Parameters

MODEL	CPTTF - 30
