

# Granule Packing Machine / 5KG Beans Packing Machine ZL-450

It is suitable for automatic packaging of small package, granular, strip, flake, ball, powder, etc.

## Main characteristics & Structure features

1. The whole machine adopts double servo control system, which can select double drawing membrane structure and vacuum adsorption drawing membrane system mechanism according to material characteristics and different packaging materials
2. The servo control system of horizontal seal can set and adjust automatically according to the pressure of horizontal seal and the opening stroke of horizontal seal
3. Various packaging forms: pillow bag, pin bag, punching bag, four-sided sealing bag, etc
4. It can cooperate with multi-head combination scale, screw weighing and other measuring equipment to achieve accurate measurement

## Specification

Model:	ZL-450 Vertical Packing Machine
Bag size	L:80-500mm W:210-420mm
Packing material	Complex film/PE film
Packing speed	12-40 bags/min
Supply type	AC380V/220V 50HZ
Air consumption	6kg/cmm <sup>2</sup> 250L/min
Machine noise	≤68db
Total power	5.8kw
Machine weight	1050kg
Machine size	2250mm×1620mm×2100mm
Pneumatic components	AirTAC
