

GCF18-18-6 Can Filling Machine for Juice / Tea Beverage

The can filling machine is mainly used for various juices, fruit teas, tea drinks, etc. The can filling machine has the advantages of advanced structure, stable and reliable work, safe operation and convenient maintenance, adopts frequency conversion speed regulation and high production efficiency, and is an ideal can filling device for small and medium-sized beverage factories.

Can filling machine is digestion and absorption of advanced foreign and domestic sealing machine on the basis of independent development of the can filling, sealing unit. Filling and sealing is the overall designed, power system by filling sealing system to ensure that both the absolute synchronization and coordination.

The can filling machine has the characteristics of filling reposefully, high speed, liquid level control, capping reliably, frequency conversion timing, less material loss

Parameter

Model	GCF18-18-6	GCF24-24-8
Production capacity(b/h)	3000-10000	5000-12000
Power(kw)	3.7	3.7
Overall dimensions (mm)	2320×1400×1900	2500×1600×1900
Weight (kg)	2200	2500
