

JGX-180 Fully Automatic Core Spiral Cover Machine

Usage and Introduction:

- This machine is mainly suitable for capping and sealing bottles of different materials and specifications.
- Suitable for screw caps, anti-theft caps, pressure caps, etc.
- Equipped with a constant torque cap head, the pressure can be easily adjusted
- The structure is compact, reasonable, and can be easily linked with other devices to form a line.
- According to customer requirements, dust covers can be provided.
- This device fully complies with the new GMP requirements.

Features:

- The operation of this machine is intuitive and convenient.
- Variable frequency speed regulation, adjustable production speed, automatic counting.
- All electrical components are made of well-known brands.
- The machine has a simple structure, stable performance, and easy maintenance.
- The outer surface is made of USU304 stainless steel, which fully complies with GMP requirements.

Technical Specifications:

- Applicable specifications: 2-1000ml
- Production capacity: 30-50 bottles/minute
- Spinning (rolling) rate: $\geq 99\%$
- Power supply: 220V/50Hz
- Equipment power: 1.2 kW
- Net weight of machine: 500 kg
- Dimensions: 2400 * 1000 * 1700mm
