

Automatic Milk Shampoo Hand Gel Body Oil Peanut Butter Cosmetic Cream Foamy Liquid Filling Machine

This machine is equipped with piston pump, and the quantitative filling method makes it more convenient to adjust filling volume. Compared with other machine, this tracking filling machine can control filling nozzle follow moving bottles during filling work. It reduce production error and improve filling accurately. It is an ideal choice for filling paste like curry paste, tomato sauce, pepper sauce, multiple filling nozzles can be controlled separately.

Main Feature

- ▶ With movable filling heads, it can fill 2400-3600 bottles/hour, fast and efficient.
- ▶ Measured by precision piston, it can fill liquid accurately.
- ▶ It can work with capping machine and labeling machine, to realize automated production.

Parameter

- Voltage: 380V/220V/110V
- Power: 8kW
- Filling Head: 2 Heads
- Filling Range: 200-2000ml (Can be customized)
- Filling Speed: 2400-3600 bottles/hour (depend on material and bottle size)
- Filling Accuracy: $\pm 1\%$
- Air Pressure: 0.6-0.7Mpa
- Air Consumption: 6-7m³/min
- Filling Nozzle Moving Distance: About 835mm
- Conveyor Size: About 113*4000mm
- Machine Material: Stainless Steel
- Machine Size: About 3000*1500*2100mm
- Machine Weight: About 515kg
