

Vertical type Automatic Labeling Machine ALM-21100

It adopts vertical type transmission, vertical type labeling, more stable, and more precise and improves working efficiency.

It's applied to label the self-adhesive label on various large size cylinder products, as wine bottle, zip-top can, ambulant etc.

This machine is widely used in electrical, pharmacy, foodstuff, and beverage, cosmetic and chemical etc industries.

It can be modified to double label, label two labels once time, more advanced, more high working efficiency, save more time and cost.

Feature:

1. Adopt High stability German LEUZE labeling system, Panasonic PLC, Panasonic Signal transmission system. Operation is stable and high-speed
2. Using touch-screen control operating system, simple, practical, efficient;
3. Adapt variety shape of object in top labeling;
4. Screw adjustment to suppress body movements accurately;
5. Synchronization chain mechanism ensures labeling smooth and precise calibration;
6. Advanced technology of pneumatic coding system, print the batch number and expiry clearly.
7. Transmission-type rolling bottles make sure the labels attached more firmly;
8. Labeling transparent label without bubble and wrinkle;

Specification:

1. Label width: 15-150mm
2. Label length: 20-314mm
3. Products Size:
Diameter: ϕ 25mm-100mm
Height: 25mm-230mm
4. Max Outside diameter of label roll: ϕ 280mm

5. Inside diameter of label roll: $\phi 76\text{mm}$
6. Max Labeling speed: 120pcs /min
7. Accuracy of labeling: $\pm 1\text{mm}$
8. Power: 220V/110V 50/60Hz 980W
9. Machine Net Weight: 200kg
10. Machine Dimension: 1950mm x 1100mm x 1300mm
