

JTJ-2 Semi Automatic Capsule Filling Machine

JTJ-2 Semi-Automatic filling Machine use in variety of domestic capsule or import capsule. This machine use electrical apparatus, pneumatic combination control. Equipped with electronic automatic counting device, Each capsule can be done automatically in place, separation, filling, locking and other movements. Reduce labor intensity and improve production efficiency, Meet the pharmaceutical health requirements. This is sensitive and reliable, accurate filling dosage, novel structure, attractive appearance, artificial convenience.

Technical Data:

Model	JTJ-2
Productivity	6000-30000caps/h
Capsule to be use	00#-4#
Type of Filling	Powder, Granule
Totak Power	3.15Kw
Net Weight	900Kg
Dimension	1400X950X1480mm
Pump	Vacuum Pump 1set
Accessories	Air Compressor 1set
