

Z-type Feeder SP-ZT18

The scope of application:

Mainly used for transporting granular bulk materials such as potato chips, peanuts, candy, dried fruit, frozen food, vegetables, chemicals and other granular or block items.

Machine features:

- Ø Hoist hopper is used the food grade polypropylene (PP) material, beautiful appearance, not easy to deform, supports high and low temperature.
- Ø Hoister can be combined with other equipment to achiness continuous or intermittent automatic weighing, packaging production lines, and maintenance is simple, easy disassembly and clean.
- Ø Non-standard size can be customized according to customer's requirements.

Technical parameters:

Hopper capacity	1.8L
Material	# 201, # 304 stainless steel, carbon steel optional
Conveying capacity	3-7m ³ /h
Voltage	Three-phase AC 220V / AC 380V, 50Hz
Power	0.75KW
Machine weight	550KG
Package Size	2050mm (L) * 1350mm (W) * 980mm (H)
