

Tube Filling Machine

Products in the form of pastes like creams, food, cosmetics, and ointments are filled in tubes with the help of machines in factories that produce them for sale in the market. This task is done with tube filling machine. It also finds use in industries that manufacture and sell toothpaste, paints, adhesive and gels. Buy best quality tube filling machine from Vista Techno pack machines. The best tube materials to be used with the machine are plastic and aluminum. The machine fills the tube with the product. The filling is done in an accurate manner so that there is no filling if the tube is not in the right position. After filling, the machine seals the tube tightly and there is no risk of leakage or opening in the tube. Tubes of all sizes both small and large can be filled very easily. The machine folds and crimps the tube to seal it.

Product Details:

Brand	VISTA
Capacity	60TPM
Machine Type	Automatic, Semi-Automatic
Condition	New
Tube Size	12-50
Packaging Type	Compound Tubes, Plastics Tubes, Metal Tubes
