

## SPZC10 One Step Blowing Machine

Model SPZC10 one step blowing machine is the newest one for PP IV. That developed by China Sun. With advanced technology that is for power control and hydraulic and pneumatic pressure and it is automatic and less consumption new machine.

Compared with traditional two step machines, SPZC10 blowing machine has less pollution, less energy consumption features. Can blow by granules into PP bottle and the process is that heating the granules to perform and heating continuously and blowing into bottles and fast process and reduce the pollution of I.V. bottle and also reduce the consumption of energy. The less consumption and pollution is the advance feature of this machine.

### Technical parameters:

Description	Specifiacion	Description	Specification
Capacity	2500瓶/小时	Suitable granule	PP
Max cavity	10腔	Max. size	Less 750ML
Max height	210mm	Max. diameter	90mm
Operating pressure	0.6~ 0.8Mpa	Operating air consumption	140 L/min
Blowing pressure	0.8~1.5 Mpa	Blowing air consumption	40L/min
Chilling temperature	10~15 oC	Chilling water consumption	35L/min
Cooling water temperature	25 oC	Cooling water consumption	140 L/min
Chilling presure	0.3~0.6 Mpa	Cooling pressure	0.3~0.6 Mpa
Voltage	380V/50Hz/3P	Max. power	79 KW
Dimension	5500×1900×3500	Total weight	10000KG
