

Low Cost Fully Automatic Tube Filling Sealing Machine LD-TS50

Application:

Suitable for plastic tube and laminated tube filling and sealing, widely used in daily chemical products, medical products, food, chemicals, cosmetics, toothpaste and so on industries.

Kindly Reminder:

We have experienced team of R & D engineers who can customize packaging solutions according to your product characteristics.

Description:

1. Premium Materials: High quality corrosion-resistant stain-less steel, inline with GMP standards, long service life, durable.
2. Color Touchscreen: Using touchscreen and PLC control system, simple operation, intuitive and convenient, complete functions, stable operation.
3. Compact Structure: Electronic components using well-known brands, stable performance, high efficiency.
4. Safe and Reliable: The power supply is provided with over-current protection, the power supply ex-ceeds the normal use range, the fuse wil automatically fuse, to protect the safety of the machine.

Parameter:

Model	LD-TS50
Voltage	AC380/220V
Pressure	0.6Mpa
Power	1.5KW
Productivity	20 to 30pcs/min
Filling Accuracy	±1%
Hopper Capacity	40L
Filling Volume	5-25ml, 15-150ml, 30-200ml (adjustable)
Tube Diameter	10 to 50mm
Tube Length	200mm
Size	1000*800*1600mm
Weight	About 600KG
