

BSIT-30B High Effective and Universal Grinder

The grinder set consists of grinder, EXC collector of raw material and ESC collective duster. It solves the problem, i.e. the dust is flying during the period of crushing raw material.

The principle of work is as follows: after raw material is fed into the crushing chamber, it undertakes the comprehensive actions such impacted by teeth, shearing force, friction force, impacted between raw materials, finally the raw materials are crushed.

The grinder, collector of raw material and ESC collective duster are all made of stainless steel and are in conformity with the requirements of GMP.

Technical Parameters:

| Model | BSIT-20B-X | BSIT-30B-X | BSIT 40B-X |
|--------------------------------|-------------------|-------------------|-------------------|
| Revolution of spindle(r/min) | 4500 | 3800 | 3400 |
| Size of feed material(mm) | 6 | 10 | 12 |
| Size of grinded material(mesh) | 60-120 | 60-120 | 60-120 |
| Size of grinding motor(kw) | 4 | 5.5 | 11 |
| Dust remove motor(kw) | 1.5 | 1.5 | 1.5 |
| Dust remove motor(kw) | 1.5 | 1.5 | 1.5 |
