

BSZG-60 Peristaltic Pump Liquid Filling Stopper Capping Machine

BSZG-60 peristaltic pump liquid filling stopper capping machine suitable for pharmaceutical all kinds of pharmacy filling, auto up stopper, outside cap and capping. This machine suitable for round glass bottle or plastic bottle filling, special specification can make special

Machine working principle: bottle enters into track come filling position plate under conveyor belt. First finish filling position, all bottle come equip-index plate by intermission moving, on the rubber plug position for finish stopper, at last finish capping.

Feature:

- Precise peristaltic pump as filling device, combatable performance, high reliability
- Filling head enter bottle mouth filling function
- No bottle down bottle stop machine automatically
- Table anti-soil, easy to clean by water
- Discharge design quickly, easy to discharge peristaltic pump
- Machine speed adjustable Stepless Adjustable suitable for difference liquid filling request
- Machine finish filling, stopper, up cap, capping function
- New model capping knife, capping is beautiful, reliable

Technical data:

Working capacity:	20-60 bottle/min (suitable volume 5-50ml)
Total power:	2.2KW
Filling precision	$\leq \pm 1\%$ (5-30ml) ; $\leq \pm 2\%$ (50ml)
Power:	single phase, 110V 50HZ
Outside size:	1500×850×1650 mm
Weight about:	450 kg
