

FK-250 Bottle Sealing Machine

The automatic aluminum foil sealing machine is based on the principle of electromagnetic induction. The aluminum foil on the bottle mouth generates high temperature instantly, and then the aluminum foil is fused on the bottle mouth to achieve the sealing function. It has good moisture-proof, mildew proof and anti-counterfeiting functions, thus prolonging the storage time of articles.

Note: the equipment can be used in assembly line or alone, and can work continuously for 24 hours

Parameter:

Model	FK-250
Supply Power(V/Hz)	AC 220v 50hz/60hz
Heat sealing power(W)	500-1000W
Application of sealing diameter(mm)	50-250
Application of material	aluminum foil, PP, PE, PET, PS and so on
Film size	About 2-3mm bigger than the cans diameter
Air pressure(mpa)	0.3-0.5Mpa
Production speed(cans/min)	20-30CPM
Dimension(L×W×H)(mm)	2000*500*1600mm
Weight(kg)	260KG
