

CGN-208D Semi-automatic Capsule Filler

Semi-automatic Capsule Filling Machine: Integrating machine, electricity and air, the machine is easy to make separate operation of such actions as feeding, separation, filling and locking etc. The machine and working panel are made of stainless steel, which conforms to sanitary requirements of pharmacy. It is also suitable for filling powder of granular medicines and health products into capsule.

Characters

1. The light-touch switches, feeding propeller and filling rotary table can be in automatic run based on preset and frequency speed control.
2. Reducing the packing cost due to high application and run on.
3. Without traditional gearbox, it is simple in structure and easy to make maintenance.
4. Keeping balance of filling amounts on both sides.

Technical specifications:

Production capacity	10000-20000 capsules/h
Applicable capsule	000#,00#,0#,1#,2#,3#,4# hard and safety-capsules
Total power	3.1KW
Compressed air	0.4-0.6MPa,40m ³ /h
Power supply	3-phases 4-line (380V 50Hz)
Overall size	1350×600×1500mm
Weight	330kg
