

## ***BDTJ-C Semi Auto Capsule Filling Machine***

This capsule filling machine suitable for filling powder and granular material in pharmacy and health food industry.

The Semi-automatic Capsule Filling Machine has independent empty capsule feeding station, powder feeding station and capsule closing station.

The medium process need to be processed by hand.

The machine adopt variable speed control, the operation is very easy and simple, and the powder material feed correctly.

The machine body and working table adopt S.S. material, meet the sanitary requirement of pharmacy.

It suitable for filling powder and granular material in pharmacy and health food industry.

*The main benefits that you will experience by using a semi-automatic filling machine include:*

1. You can use it to fill different types of fillers including powders, pellets, or granules.
2. It provides automation up to a certain degree thus increasing the speed of production.
3. You can use it for a considerably larger scale of production in comparison to the manual capsule filling machine.
4. The initial cost of purchasing it is lower in comparison to a fully automatic capsule filling machine.
5. Using this machine eliminates almost all of the personnel you would employ when using the manual filling machine.
6. The filling accuracy is higher than that of the manual filling machine.

7. The machine adheres to the right manufacturing quality standards hence safe for use.
8. The operations of the machine do not emit large sound hence a peaceful working environment.

**Technical Parameters:**

<b>Model</b>	<b>BDTJ-C</b>
Maximum productive capacity Capsule/Hour	12000
Capsule size	00#-4#
Air Pressure(Mpa)	0.4-0.6
Air supply	≥0.1m <sup>3</sup> /min
Power	2.0Kw
Overall dimensions mm	1200x720x1600mm
Weight Kg	330Kg
