HYWB-100F Automatica Cylinder Raking Bottle Washing Machine

Automatic rolling drum ultrasonic bottle washing machine is suitable for 20-1000ml, all kinds of materials or irregular bottles which have boulders wash the bottle inside and outside alternately by water, lutetium water and air to achieve the production request and it can below initial. According to your production requirement, you can add the ultrasonic system, meet the GMP requirements. Structure is compact and special, the washing crafts is rational. The clean class of the bottle after washing is high. Dosage of the water is less. Simple operation, convenient maintenance.

Automatic rolling drum ultrasonic bottle washing machine is widely used in bottle inside washing of daily chemical, agricultural chemical, food, personal care and pharmaceuticals industry.

Main technical data

- Bottle range: 20-1000ml customized
- Capacity: 30-50bot/min
- Air Supply: 15m³/h,0.4-0.8Mpa
- Water Wastage: 0.6-1 t/h, 0.8Mpa
- Power Supply: 220V/50Hz or customized
- Power: 1.6kw
- Weight: 400 kg
- Dimension: 1300X950X800mm
