

High-Speed Continuous Packing Machine

The high-speed continuous packaging machine has stable performance, convenient operation, improves production efficiency, saves labor costs, and can be full of packaging according to customer requirements, to achieve lasting preservation.

Product Features:

1. Adopt the industry standard, good performance, stable and reliability.
2. Three servo control, continuous pull film high-speed packaging, up to 110 packages per minute.
3. Automatic deviation correction function, convenient, intelligent.
4. Fast packaging speed, effective savings on labor costs, save space.
5. The multilingual interface is available.

Application:

It is suitable for thick or semisolid substances, such as a paste, bee, sauce, and shampoo, body wash, salve, conditioner, food, medicine, etc.

Product Parameters:

Product name	High-speed continuous packing machine
Bag size(mm)	L50-210mm W20-65mm
Packaging speed	20-120 bags/min
Measuring Scope	1-120ML
Feed Mode	magnetic drive pump, centrifugal pump, Pneumatic piston pump, HIBAR
Packing Material	PET/PE, PET/AV/PE, NY/AL/PE, NY/PE, ETC
Total power	3.8KW/AC 380V
Machine Dimension	L1400x W1300x H1800mm
Sealing type	Back sealing, three-side sealing, or four sides sealing
Machine weight	500KG
