

Semi-automatic Capsule Filling Machine

It applies to empty hard capsule filling of powder, granular medicines and healthy products.

Features:

Semi-automatic capsule filling machine for small and medium sized pharmaceutical companies, health care products factory, hospital preparation room carefully crafted a set of electricity, gas as one of the new semi-automatic capsule filling machine, novel structure, attractive appearance, top body and work, stainless steel, the product meets the GMP requirements; machine with programmed control system, touch panel operation (V-type), frequency conversion stepless adjustment of the joint control of pneumatic and electronic automatic counting device can automatically complete the capsule of the U-turn on spaces, separation (cap body torn off), drug filling, locking etc, and filling dose accuracy, easy to operate. Applicable to powder, granular medicines and healthy products in capsule filling!Is the ideal semi-automatic capsule filling machine.

Parameter:

Capacity	12.5-20 thousand pcs / hour
For capsule	00 # -5 #-made or imported machine capsule
Filling formulations	Powder, small granules
Air Compressor	0.4-0.6 MPa
Power	380 v, 50 hz three-phase four-wire 2.2KW
Machine size	1200 × 700 × 1600mm (length × width × height)
Weight	330KG
Ancillary equipment	a vacuum pump, air compressor (user-owned)
