

## ***XH-2100B Automatic Electromagnetic Induction Aluminum Foil Sealing Machine***

### **Features**

1. Digital display operating voltage, current, intuitive and clear.
2. Over-current pressure, automatic protection, safe and reliable.
3. Integration, wind cooling, sealing power, good quality, stable performance;
4. With the automatic assembly line production, or independent work;
5. Electronic components are using the international brand products;
6. All stainless steel shell, beautiful and generous.

### **Technical Parameters:**

- Rated voltage: AC 220V 50/60HZ
- Maximum power: 4500W
- Sealing diameter (optional): 15-60mm/30-121mm
- Applicable occasions: mass production
- Packing size: 1580\*420\*880mm
- Sealing speed: 0-280 bottles/min
- Host size: 1500\*400\*1255mm
- Weight: 75KG
- Cooling method: air-cooled
