

DXDK-900 Granule Packaging Machine

This machine is suitable for pharmaceutical industry, food and cosmetics industry. Powder, tablets, viscous material can be packed in bag by this machine. It will be well sealing and water resistance for special light and humidity sensitive material. Prevent from gas, ultraviolet rays which is greatly extending the shelf life of material.

Performance Advantage

1. Patent design feeding hopper for special filling material control by servo motor, the system is applicable widely for various special filling material.
2. Actuators are installed on the two vertical plate, enough stiffness guarantee the machine can running stably in high speed.
3. Automatic batch printing, with the vertical and horizontal direction easy tear fracture line and easy tear notch function.
4. With automatic check sensor function, which guarantee two sides logos perfectly.

Main Technical Data

Model	DXDK-900
Packaging Material (mm)	ALU-PVC, Paper-Poly, Plastic and ect can be heating sealing material
Packaging(mm)	Width: Max 900
	Thickness:0.05-0.1
	Outer Diameter: MaxΦ300
	Inner Diameter: Φ70-Φ76
Sealing format Width (mm)	Max : 450
Bag Size(mm)	Length:55-120
	Width:50-150
Filling capacity(ml)	Granule:0.5-15
	Liquid:1-40
	Powder:1-5
	Tablet:several
Packaging capacity(time /min)	50
Capacity (bags/min)	Max 400 (according to bag size)
Power	380V 50HZ 9.5KW
Size L×W×H (mm)	1560×1620×2150
Net weight (kg)	1200
Re : No additional information noted if there are any changed caused by the technical development.
