

DPB-250E-I/III Flat Plate Blister Packaging Machine

This machine is suitable for capsule, tablet, honey pill, candy, one injector and irregular-shaped AL/PL, Paper/Plastic packing in pharmacy, food, electronics, medical equipment industry etc. This machine adopted with micro-computer PLC, can choose computer panel or touch screen operation, frequency Speed regulation, easy operation, it is ideal packaging equipment at present.

FEATURES:

1. Heat-sealing station fixed, it can freely adjusted distance in the same flat surface for forming, perforation and cutter etc parts. It is suitable for various sizes of medicine package, and it has high precision and good suitability.
2. Adjustable stroke, automatic feeding, register heating, positive pressure forming, up and down net web, cylinder heat-sealing, automatic perforation and printing batch number, mechanical dragging, easy operation, stability of working.
3. It is adopted with imported gear reducer with lower noise and long life.
4. Mould pressing plate orientation, register correction and convenience of replacement.
5. Computer Panel and touch screen for your choice, easy operation.

Technical specifications:

Cutting frequency (times per minute)	6-50
Productivity (10 thousand pcs. / H)	3.5-23
Max. forming area and depth (mm)	240 * 150 * 26
The amplitude of the displacement (mm)	40-160 (can be designed according to customer requirements)
Standard Plate (mm)	80 * 57 (it can be designed according to customer requirements)
Air pressure (MPa)	0.4-0.6
Air supply	≥0.3 m ³ / min
The total capacity	380 V / 220 V 50 Hz 6.2 kW
Main engine power (kW)	1.5
Solid parts of PVC (mm)	0.15-0.5 * 250
Aluminum foil PTP (mm)	250 * 0.02-0.035
Dialysis paper (mm)	50-100 g * 140
Cooling form	Tap or circulating water
Dimensions (mm)	2900 * 720 * 1550 (L * W * H)
Weight (kg)	1 600
