

## *12 Nozzle Pen Type Filling Machine*

The 12 Nozzle pen type filling machine, is designed to filling the pen type product, such as the lipstick pen, Eyeliner, eyebrow pencil. The simple operation and high working efficient make it very popular among the lipstick manufacturer.

### **Introduction**

The color cosmetic machine is the main production of our company. We manufacture the lipstick, powder, mascara whole set production machine. Which include the lipstick filling machine, mascara filling machine, powder filling and powder compacting machine.

The 12 Nozzle pen type filling machine, is designed to filling the pen type product, such as the lipstick pen, Eyeliner, eyebrow pencil. The simple operation and high working efficient make it very popular among the lipstick manufacturer. The machine can be use alone, or with other several parts connected together, such as the chilling machine, mould release machine, etc.

### **Features**

- Human-machine interface touch screen panel and servo control, feed mould lifting. Adopts servo motor drive, digital control, high stability, can pack 12 at a time.
- Built-in 50 group memory modules, setting parameters and accessing the operation is simple.
- The 12 nozzle pen type filling machine adopts extrude aluminum frame.
- 10 liters of double insulation sealing material barrels, electrical and mechanical stirring speed regulating function.

## Advantage

1. The 12 nozzle pen type filling machine has two heating and stirring hopper, can keep the material in liquid condition.
2. The double hopper can achieve continue filling, one of the hopper for filling, another one preheat. When the material in the first hopper used out, we switch another one, move in circles.
3. The filling machine can be use alone or with other several parts connected together.

## Application

The 12 nozzle pen type filling machine is design for the color cosmetic production. It suitable for the Lipstick, eyeliner, eye brow pen.

## Technical configuration

Name	Mechanical Specifications
Outside dimension	1100x1900x1900mm
Voltage	220V/1 phase
Power	6kw
Product type	Eye liner(liquid) , eyebrow pencil, lip pencil
Production	60 pcs/minute
Maximum volume	0.5-5ml
Barrel volume	20L, Single-layer tank heated by oil
