

Automatic Weighing Machine For Aerosol Filling Line 3600

This automatic weighing machine for aerosol filling line, adopted advanced weigh sensor and detecting device, which is controlled and operated by Siemens PLC and Schneider component with low voltage. All electrical appliances have been placed in explosive-proof cabinet.

We use touch screen and there is instruction for all fault, which make the operation easy. The excellent conveying design makes products run stable. The sides which can guarantee quality of products. This machine with high accuracy and good stability can run fast and so on.

Technical Parameters:

Machine dividing value:	0.1g
Deviation for static cetection:	0g
Max deviation for dynamic detection:	±1.0g
Max testing weight:	1500g
Max detection speed:	130 cans/min
Applicable range of product:	φ35mm-70mm
