

## *CapperPacks Automatic High Speed Can Sealing Machine*

The CapperPacks Automatic High Speed Can Sealing Machine is mainly suitable for sealing round tinplate cans, and it is an essential and ideal packaging equipment for food, daily necessities, chemical and other industries. It adopts programmable logic controller (PLC) and touch screen control, humanized intelligent high-speed control system, fully automatic production line design, and it is very easy to form an assembly line with filling system, weighing filling system or labeling system.

### **Technical Parameter**

- Machine material | · stainless steel 304
- Operation interface | touch screen
- Canned seal number | 1
- Closing speed | 40-50bottle/min
- Can sealing height | 70-120mm adjustable(Non-standard customization)
- Applicable bottle diameter | 35-100mm(One caliber only)
- Voltage | AC220/380V 50Hz~60Hz
- Total power | 1.1KW
- Dimension (L\*W\*H) | 2000×1000×1800mm(2M conveyor belt)
- Machine weight | 500KG
- Maximum sealing can diameter | 130mm
