

Z Type Conveyor

Thanks for visiting website of RezPack! This page gives detailed introduction of RezPack conveyor equipment, which includes many types shown as below.

Application:

The bucket conveyor, also known as Z type conveyor, is suitable for elevating granular products in grain, food, feed, and chemical industries.

Main Features:

- A. The bucket conveyor is used mainly to convey the solid food, such as rice, chip potato, candy, etc.
- B. Bucket elevator, together with computer weigher and packing machine, forms an automatic quantitative packing system, which is widely used in food industry.
- C. The Z type conveyor is made of 304 stainless steel and plastic (PP), which is safe and hygienic.
- D. The conveyor equipment is controlled automatically.
