

Vacuum Packaging-Double Chamber DZ-500-2SB

Double vacuum chamber vacuum packaging machinery suitable for high production. Machinery are made of stainless steel according to CE and are equipped with a volumetric electronic sensor to constantly control vacuum and gas packaging. Vacuum cycle can be excluded it is possible to control air immersion in the chamber.

The double vacuum packing machinery with high density polyethylene plates to reduce chamber volume are supplied with the machine. Upon request, machinery can be assembled with gas injection attachment. The vacuum step can be speedier with powerful pump.

Specifications:

Model:	DZ-500-2SB
Pump (m ³ /h):	20*2
Power:	0.9*2
Work cycle (times/min):	1-2
Gross weight (kg):	287
Net weight (kg):	233
Carton size (mm):	1500*810*1080
