

Shrink Packaging Machines SPSLD-600

Shrink Packaging Machines Model SPSLD-600: It uses the latest Indian Heaters, Saving power by almost 20%. # seals PP/PVC shrink film # variable speed controller, for operation the m/c as per your operator convenience # Separate controls for Heater / Cooler fan given good and perfect shrink seal. # Robust m/c design & long working life. This product adopts infrared radiation in direct heating of LD/ PVC/POP Shrinking membrane to achieve optimal contraction packaging. This systemic made reliable by electronic stepless shift and booster in temperature control, which is applied in contraction packaging for food, beverage, candies, stationery, hardware tools, daily necessities and chemical products

Parameter:

- Product size used: - 16 W X 16 H inch* (*- Tunnel size as per product application we can make it)
- Voltage: 430V 50Hz
- Power: 10 KW
- Feeding speed: 0-10m/min
- Feeding weight: 45-50 kg
- Workroom size: 40' L X 16" W x 16 " H
- Weight: 150kg, Gross Wt upto-200 Kg.
- Verifiable speed drive
- Belt /rod conveyer
- Double blower
- Cooling fan
- Shrinkable film use: LD / PVC / polyoly flim.
