

Packaging Machine for Canned Chinese Herbal Slices

Grab full automatic packing machine mainly adopts frequency conversion speed regulation and PLC control technology, combined with man-machine interface, realize stepless speed regulation, easy to operate, compact and reasonable structure and high degree of automation. The equipment is used in a variety of industries, such as edible oil, dairy products, beverage, pharmaceutical industry, etc. Full automatic packing machine is used to pack all kinds of containers, such as flat plastic bottles, round bottles, irregular shaped bottles, glass bottles of various sizes, round bottles, oval bottles, square cans and paper cans, etc.

Technical parameters:

1. Mechanical size: about 2000L*2500W*2400H(mm)
2. Packing speed: according to customer requirements
3. Carton specification: according to customer requirements
4. Product feeding height: according to the height of customer's on-site delivery line
5. Conveying height of carton: depends on the height of the on-site conveying line of the customer
6. Power components: Taiwan city-state
7. Straight slip track: Japan THK
8. Photoelectric component: Japan Omron
9. Pneumatic component: Taiwan adecker
10. Power rate: applicable
11. Power supply: 380V
12. Applicable air source: 0.4-0.6mpa, 30L/min

Technical parameter:

Range	10-500g
Materiel	granule
Model	full-automatic
Speed	30 bottle/min
Form	in bottle
Products	Chinese herbal slices, rhizome slices, flower tea, etc
