

## Automatic Feeding Flow Wrapping Machine (F-Z400L)

This machine is used for the product row by row when come out from production line.

For example, it can connect with chocolate molding line, cereal bar cutting line, etc.

### Application:

Candy, bar product, Chocolate, Biscuit, similar product wrapping.

### Main Feature:

1. Servo motors controls, rapid and precise reaction.
2. Intelligent temperature controller system, displayed easily, easy for setting, low rate of maintenance.
3. Reasonable structure, stable running and long service life.
4. Double paper rollers with automatic rapid paper splicer device
5. Innovative L feeding system, efficient and save the space.

### Technical parameters:

Model	YW-Z400L
Packing Speed	50-400pcs/min
Packing Product	Chocolate, biscuits, bread, commodity, and similar products
Finished bag length	50-320mm
Total Power	4.5 KW
Voltage	380V 50/60HZ
Weight	950kg
Outside Dimension	3800*990*1570mm
Wrapping film	OPP, CPP, PET, Aluminium plating film, aluminium plastic film, hot-sealing film, etc.
