

***Pillow Package Machine ES-200***

Used in candy, cookies, snow cake, Shahe, rice balls, chocolate, moon cake, ice cream, bread, pie, seaweed, napkins, soap, mosquito coils, pharmaceutical and industrial parts single or collection of lumps, bulk material packaging.

**Main performance and features:**

The whole master Siemens programmable logic controller (PLC), the machine runs precise, stable and reliable. Chinese display of the man-machine interface, the settings are stored, convenient and fast. The main motor configure high quality AC frequency steeples speed. Precision photoelectric detection tracking, two-way automatic compensation, accurate and reliable. The bag length is adjusted by a toothed chain CVT, durable, stable and accurate. Conveyor chain without stopping the machine to adjust the device, convenient, sensitive. Center of gravity

Automatic feeders, wide adjustment range, applicability, simple and stable. Adjustable side seal structure, sealing more perfect cut package and the exclusion of the phenomenon.

*Note:* You can configure nitrogen filling device, install hot code printer, print position can be arbitrary choice.

| <b>Model</b>                        | <b>ES-200</b>        |
|-------------------------------------|----------------------|
| Supply Voltage                      | AC 200/50 110/60     |
| Packing speed                       | 100-200 bag/min      |
| Power (KW)                          | 2.4                  |
| To adapt to the film thickness (mm) | 0.04-0.06            |
| Bag size (L×W×H)(mm)                | 10-200 ×10-100× 5-50 |
| Overall feet (L×W×H)(mm)            | 3770×670×1450        |
| Weight (kg)                         | 450                  |
