

HB25-PE Automatic Bagging Machine

HB25-PE automatic bagging machine mainly used for PE bag (polyethylene bag). It has fully bagging functions, such as weighing, filling and bag sealing. Stainless steel structure suits a lot of industry, such as food packaging, chemical packaging, pharmaceutical packaging, etc. The speed can be up to 1200 bags per hour.

Features:

- Perfect bagging system structure designed
- High speed designed for heavy bagging
- High bag weighing accuracy
- The large volume of magazine saves time and labor cost
- Good sealing performance for PE compound plastic bag
- The famous brand of electrical parts with excellently programmed bagging system
- Double vacuum pumps supply strong power with stable performance
- Adjustable conveyor designed for bagged products conveying out
- From raw material to bagged products without human interfere
- The intelligent alarming system guarantees the security
- Plastic bag sealing makes a long product shelf life

Specifications:

ITEM	INDEX
Packing Range	25kg/bag
Weighing Precision	+/-0.2%
Packing Speed	600~1200bag/hr.. (standard good fluidity)
Voltage/Power	AC380V 50HZ <=7.5kw (Available for custom-made)
Air Consumption	2 m ³ /min.
Preformed Bag Size	L*W=800~1000mm x 450~500mm
Preformed Bag Material	PE Bag (Polyethylene bag)
Dimension (L*W*H)	4700*3400*3900 (mm)
Weight	2400kg

Options:

- Double-head Weigh-filler
- Infeed-outfeed system
- Printer & Labeler
- Tracing for brand anti-fake system
- Robot/Palletizer
- Winding Machine
