

Automatic Shea Butter/ Peanut Butter Filling Machine CK-GZ2GT

The peanut butter filling machine is made of stainless steel, the material contact part are all made of stainless steel, ensure that international health standards are met. The filling amount can be arbitrarily adjusted within the specified range, and the measurement error is small.

shea butter

sesame butter

honey

jam

The sheaf butter filling machine is pneumatically used as the working power of the equipment. It is composed of the operating table, the storage hopper, the reversing valve, the plunger pump, the cylinder and the pneumatic valve. It can be used in different working environments.

Peanut Butter Filling Machine Features:

- Motor: Low vibration, low noise, high energy saving, small power consumption, long life, superior performance.
- 304 stainless steel large hopper: Automatic mixing function, filling evenly, without precipitation. The width of the blade is large and the agitation is more powerful and uniform.
- Control switch: high quality control switch, flexible and easy to control, saving time and effort.
- More user-friendly design: Uniquely designed motor box, pull-out design, safe and secure, better protection of the motor and easier maintenance of the peanut butter filling machine.
- Unique bottle delivery design, it can reduce some manual operations and reduce the tedium of work.

Peanut Butter Filling Machine Use:

The shea butter filling machine is widely used in the filling of various semi-fluid, paste, viscous and thick sauce materials. Such as syrup, honey, sesame sauce, ketchup, jam, peanut butter, chili sauce and other creams.

Model	CK-GZ2GT
Filling Bottle	PET bottle,glass bottle,etc
Measuring range	10-1000ml(can custom)
Bottle Size	∅20-150 mm,height10-250mm
Packing Speed	10-20bottle/min
Filling valve number	2
Voltage	220VAC/50HZ
Power	500W
Dimensions	2000L×1000W×1850H
Weight	350KG
Precision	≤±1%
